PROFILE

Motivated IT undergraduate at SLIIT with hands-on experience in full-stack web development using the MERN stack. Skilled in building responsive web applications, REST APIs, and database-driven systems. Passionate about software engineering, problem-solving, and learning modern technologies through academic and personal projects.

SKILLS

- Languages
 - Java, JavaScript, Python
- Web Technologies
 - HTML, CSS, REST APIs
- Frameworks
 - Spring Boot, MERN Stack (MongoDB, Express, React, Node.js)
- Databases
 - MySQL , MongoDB
- Tools & Platforms
 - Git, GitHub, IntelliJ IDEA, VS Code

SOFT SKILLS

- Problem Solving
- Team Collaboration
- Communication
- Time Management
- Quick Learning

CERTIFICATES

- AI/ML Engineer Stage-1
 - SLIIT -2026
- Web Design for Beginners
 - University of Moratuwa -2025

LANGUAGE

- Tamil(Native)
- English(Proficient)

EDUCATION

BSc in IT
Specialization in Software Engineering
SLIIT – Sri Lanka
2024 – Present (Expected 2028)

G.C.E Advanced Level (A/L)
Kokuvil Hindu College, Jaffna
2023
Physical Science Stream

PROJECTS

Automatic Healthcare Monitoring System (2024 JUL-DEC)

Arduino, GPS, GSM

- Developed a Motor Bike Accident Detection System using Arduino with GSM/GPS modules for real-time emergency SMS alerts.
- Implemented vibration sensor logic to detect accident events automatically and tested sensor accuracy.
- Designed and documented a complete IoT safety system in a team environment.

Grocery Order Management System (2025 JUL-DEC)

Java 17, Spring Boot, MySQL, Maven

- Designed REST APIs for order processing, cart, checkout, payments, and stock updates.
- Developed backend modules for inventory management, delivery handling, promotions, and payment reports.

Tomato Leaf Disease Detection (2025 JUL-DEC)

Python, CNN, Kaggle

- Developed a CNN-based model to detect tomato leaf diseases with high accuracy.
- Trained the model on 18,000+ labeled images from the Kaggle Tomato Leaf Dataset for early agricultural disease detection

Healthcare Monitoring System (2026 JAN)

Java 17, Spring Boot, MySQL, Maven

- Built a full-stack hospital management web application for booking doctor appointments, ambulance services, and ordering medicines with home delivery.
- Implemented Cash on Delivery and Online Banking payment support using IntelliJ IDEA.

Skill-Based Internship Matching System (2026 JAN-JUN)

MERN Stack, Next.js, Cloudinary, JWT

- Developed a full-stack web application to match students with suitable internships based on skills and profiles.
- Implemented rule-based inference (forward chaining) for automated internship recommendations.
- Built RESTful APIs using Node.js & Express; managed data using MongoDB.
